We Understand Technology.

Job Consultacny Platform

Company Profile

- **Custom software development**
- **Offshore software outsourcing**
- **Advanced software technology training**

Objectives

- **Secure Registration and Profile Management**
- **User-Friendly Interface for Job Search and Posting**
- **Advanced Search and Filtering Options**

Architecture

Internship Learning

- **Fundamentals of Web Development**
- **Integration of MERN Stack Components**
- **Testing and debugging**
- **APIs and Authentication**

Skills Used

Future Work

- **Advanced Search and Matching Algorithms**
- **Scalability and Performance**
- **Improved User Interface and Experience**
- **Continuous Improvement and Innovation**

Methodology

- Requirement Gathering and Analysis: Identify key functionalities and features necessary for the platform.

- Design and Development Phases: Develop wireframes and prototypes to visualize the user experience and workflow.

- Integration, Testing, and Deployment: Seamlessly integrate frontend and backend components for real-time data synchronization.
